Bournemouth Archaeology

Historic Building Recording & Built Heritage

Bournemouth Archaeology

Bournemouth Archaeology is a multi-disciplinary heritage consultancy with a long established track record of providing heritage planning advice to its public and private sector clients.

Understanding the historic environment is a fundamental part of the planning process and we undertake a wide range of historic building recording projects as required by statutory authorities.

We tailor our services to meet your needs

Our experienced specialist team provide an efficient service for the swift discharge of planning conditions. We provide written schemes of investigations for all projects, agreed through liaison with statutory authorities on your behalf.

Our surveyors provide Levels 1-4 building analysis in accordance with English Heritage guidelines, as well as identifying and dating historical fabric, fixtures and fittings to minimise the risk to a building's character and integrity.

We provide clear and simple advice on:

- Pre-planning heritage services to guide you through the early stages of the planning process
- Heritage management to identify and develop your heritage assets and their value
- Building conservation and historic buildings appraisals.

Our services include:

- Statements of Significance
- Written Schemes of Investigation
- Pre-application advice
- Historic Building Recording
- Environmental Impact Assessment
- Heritage Statements
- Building Assessment
- Area Assessment
- Conservation Area Appraisal
- Site evaluation
- 3D laser scanning.
